Hello Tommy,

I'm the Inventory & Monitoring coordinator for a group of 14 National Park Service units including Cowpens National Battlefield in SC. We are just beginning to monitor foliar injury from ozone and would like to make a case for the continuation of this monitor. Based on biosite data from 1999-2002, maps compiled by USFS show this area to be a high risk of probable ozone injury to forests (USFS-General Technical Report NRS-20, December 2007). Data from this monitor provides us with the information needed to determine potential injury levels, which can trigger onsite monitoring of ozone sensitive plants. It would be very useful to us if the monitor could continue at Cowpens.

The 2009 Ambient Air Monitoring Network Plan is being published today for public inspection and comment. Public comment on this plan will be accepted through July 2, 2008. This document contains the planned changes and final description of the sites and monitors of the South Carolina Ambient Air Monitoring Network for 2009. Comments from the public will be accepted via the U.S. Postal Service, or email. Please address any comments you have to Tommy Flynn, 2600 Bull Street, Columbia, SC 29201, or flynntj@dhec.sc.gov.

The proposed plan may be found at the following address:
